

Thank you for purchasing from Armadillo Industries, Inc.

Important Please Read

Installation Instructions: 1. Remove existing strap and door bracket. Use T20 Torx drive to remove the screw attaching the existing door bracket. (Keep these screws for reinstallation of new door stops.) Ensure that mounting surface is clean and dry prior to installation. 2. Remove Armadillo door stops from their packaging. Note: There is a left and right side door stop. The "Left" or drivers side stop is marked with an "L" and the "Right" or passenger side stop is marked with an "R" .

3. Use the existing Torx screws to mount the stop to the door with the head of the bracket bolt facing up. 4. Using a 10 mm wrench remove existing door post. 5. Place retainer behind door post. 6. Reinstall post and retainer onto vehicle. 7. Close the door and pivot the door stop block onto the existing door post. 8. Repeat the same procedure for the second door stop. 9. Ensure that the mounting bolts holding the existing door posts are tight using a 10 mm wrench. 10. After several opening and closing of the door tighten stop nut on shaft with 13 mm wrench. Note: If door stop becomes sticky or squeaks apply wheel bearing grease to shaft. Also On some early models and vehicles with half doors trimming of the plastic interior panel is required.

Limited Warranty: Armadillo Industries Inc. warrants to the original retail purchaser only that this product is and will remain free from material defects for a period of one year from the date of original retail purchase. All implied warranties, if any apply, are limited in duration to the term of this written warranty.
